

SWIFT TACTICAL is a certified NAEMT Training Site and a certified AAOS Emergency Care & Safety Institute Education Center.

Jason Ames retired in 2021 from the Los Angeles County Sheriff's Department, after over 25 years of law enforcement service, and has been an EMS skills instructor since 2008. He continues to serve as an EMT volunteer with LASD Search and Rescue, and as an instructor of active threat and medical response courses for LASD personnel.

Jason is a certified CAPOST Academy and First Aid/CPR/AED/TECC Instructor. He is a DHS certified Tactical Medical Instructor and Active Shooter Threat Instructor.

Jason has extensive training in FEMA/ICS Emergency Disaster and Terrorism Response, and continues to serve on LASD's Disaster Incident Management Team.

Jason is certified by NAEMT as a Training Site Course Coordinator, Instructor, and Provider for Tactical Emergency Casualty Care for Law Enforcement Officers (TECC, TECC-LEO), Prehospital Trauma Life Support (PHTLS), Psychological Trauma in EMS Patients (PTEP), Geriatric Education for EMS (GEMS), All Hazards Disaster Response (ADHR), and First On The Scene (FOTS) courses.

**Critical injuries can be fatal before EMS professionals can arrive.**

**Learn the skills needed to save lives in the event of a traumatic emergency.**

**Be prepared.**

**Train at your location, with your personnel.**

**Be ready.**

## Tactical Emergency Casualty Care for Law Enforcement Officers

This 8-hour course teaches the concepts of rapid critical trauma care, as established by the Committee for Tactical Emergency Casualty Care, the American College of Surgeons' Hartford Consensus, and the National Association of EMTs.

These principles provide the law enforcement responder with the critical skills to effectively intervene and mitigate the loss of life following any emergency trauma incident.

Critical injuries can be fatal in less than 5 minutes. This course teaches the skills to stabilize critically injured victims, law enforcement officers or civilians, and to keep them alive until advanced medical help arrives.

**THIS COURSE TRAINS THE SKILLS REQUIRED BY CA TITLE 22 AND REDUCES AGENCY LIABILITY BY PROVIDING RESPONDERS THE CRITICAL SKILLS TO PRESERVE LIFE IN TRAUMA EMERGENCIES.**

## Learn these critical skills with hands-on training and practical application scenarios:

- Threat response protocols of TECC
- How to perform the MARCH rapid trauma assessment
- How to recognize life-threatening injuries
- How to treat massive bleeding using tourniquets, hemostatic dressings, and pressure bandages
- How to treat and manage airway issues
- How to treat and manage lung function compromise
- How to treat and manage penetrating chest wounds using occlusive chest seals
- How to care for traumatic shock, hypothermia, and head injuries
- How to treat and manage traumatic burns.

## Trauma kit solutions available:

- Patrol trauma kits
- Advanced trauma kits
- Critical burn trauma kits
- Mass casualty response kits
- Tourniquets
- Hemostatic gauze
- Occlusive chest seals
- Pressure bandages
- Emergency heat blankets
